TTY/D use Maryland Relay Service

Opening Date:	September 15, 2006	Closing Date:	Open until filled
Job Title:	Senior Manager - Application Development	Position Type:	Regular Full Time
PIN:	073299	FLSA Status:	Exempt
Location:	Judicial Information Systems Annapolis, Maryland	Grade/Salary Range:	T17 \$74,428 - \$109,859
Financial Disclosure:	Yes	Entry Range:	T17 \$74,428 - \$89,171 (Depending on Qualifications)

Regular State employees subject to promotion/demotion policy

Essential Functions: This position is responsible for the development, delivery, enhancements and maintenance of Judiciary-wide application systems, focusing on the enterprise's migration to a Service Oriented Architecture (SOA). The Manager will oversee a group accountable for legacy applications with the intent to maintain and transition those applications to a service oriented architecture framework. The manager will also be responsible for applications implemented to-date in the new enterprise SOA. The Manager will help align departmental resources, recommend viable transition states, and define software development processes and standards within a SOA framework to facilitate component reuse, best practices and resource allocation throughout the life cycle (including application design, development, testing, and ongoing maintenance, support and user training), ensuring the development process is properly followed. Interact closely with other teams working on future-state architecture, strategy development and budgeting, and those implementing and managing on-going system changes. Responsible for managing direct reports, including Technical Project Leads/Managers, and mentoring development teams.

Education: Bachelor's Degree in an Information Technology or closely related field is required.

Experience: Minimum of eight years of experience in Information Technology design and development within a large IT organization to include three years of experience managing software development projects.

Note: Additional relevant experience may be substituted for required degree on a year for year basis.

Skills/Abilities: Full understanding of Service Oriented Architecture and Object Oriented Programming. Strong knowledge of and experience with all phases of systems development life cycle for large systems, including strategy development. Strong team building, staff development, change management, and leadership skills. Extensive knowledge of project management processes and best practices. Strong background in full lifecycle development using multiple platforms or languages, including leading teams developing and supporting Java Applications under Unix, Oracle and supporting IBM Mainframe, IMS, COBOL, CICS applications. Excellent interpersonal, communication and organizational skills required. Understanding of documenting business and system requirements, UML, use case creation, and data modeling. Ability to perform all essential functions of the position.

Please submit a Judiciary application (unsigned applications will not be accepted) or resume and cover letter stating position title. Materials must be received at the address below by 4:30 p.m. on the closing date. The Human Resources Department will not be responsible for applications/resumes sent to any other address.
